

15 FACTS TO KNOW BEFORE GETTING THE COVID VACCINE

1. This is NOT a Vaccine
2. It's an experimental mRNA injection
3. Rushed through clinical trials
4. For all 72 CDC recommended vaccines for children, no long term studies or double blind placebo tests have been conducted
5. No safety pharmacological studies have been done
6. Long list of immediate side effects
7. People are DYING from the vaccine
8. Vaccine manufacturers have NO LIABILITY if you DIE
9. Not effectively preventing or containing Covid
10. Contains experimental, industrial and proprietary chemicals
11. The Emergency Use presumes no other treatments for Covid
12. Doctors presenting science against Covid are being censored
13. You're just as likely to die from lightning as you are from Covid
14. The PCR test doesn't tell you if you're sick
15. People aren't dying from Covid; they're dying from comorbidity

1. **This is NOT a Vaccine:** traditional vaccines inject small virus parts, where the body's immune system response can create antibodies to combat that virus. DNA tells every cell what to do, while mRNA are the instructions from your DNA to the rest of the body.
 - a. This vaccine is a **SYNTHETIC** mRNA that uses tiny nanoparticles that punch holes into cells and carry mRNA instructions made in the lab and instruct your body to make parts of the Covid-19 virus.
 - b. The Covid vaccine bypasses your DNA the same way a computer hacker bypasses the security firewall of your computer: the hacker spreads a virus; the injection hacker makes part of the virus BUT YOU'RE NOT A MACHINE. How can you be sure it's safe and the only code they're injecting into your cells is the code supposed to fight Covid-19?
2. **It's an experimental mRNA injection:** This mRNA vaccine is a synthetically, genetically modified technology vaccine that has never been used on humans before so **YOU** are the lab rat. (Source: <http://tinyurl.com/8727fjmk>) This is an FDA **UNAPPROVED** vaccine **ONLY** approved for emergency use. (Source: tinyurl.com/92656nyr)
3. **Rushed through clinical trials:** In a first for vaccine development, two Covid-19 vaccines were created, evaluated and authorized for emergency use in **under a year**. However, between basic research, prototype, animal studies, safe manufacturing process, all considered before testing on people, presuming all the regulatory agencies, developers, funders, and health experts are all in consensus about the safety of the vaccine, "vaccine development is a long, complex process, often lasting 10-15 years and involving a combination of public and private involvement." (Source: tinyurl.com/y88269nv).
4. **For ALL 72 CDC recommended vaccines for children, no long term studies or double blind placebo tests have been conducted:** Merck's Hepatitis B vaccine (recommended for all babies at birth) only got a 5-day safety review and NO PLACEBO GROUP so if your baby dies (SIDS) on day 6, the vaccine cannot be blamed (Source: tinyurl.com/yd4kbbhr8). The safety review for the polio vaccine was ONLY 48 HOURS (Source: tinyurl.com/yufwvjmvy). Because it was rushed to market, the Covid vaccines had NO LONG TERM SAFETY REVIEW and only monitored the effects in the clinical trials for 1 **or** 6 months (Source: tinyurl.com/ntw994p7)
5. **No safety pharmacological studies have been done.**
 - a. For the **Pfizer mRNA BioNtech** vaccine (Source: tinyurl.com/y83sn3e9)
 - i. **No** studies were done to see how the injection reacts with other drugs that you may be taking.
 - ii. **No** toxicity studies were done on a single dose.
 - iii. **No** toxicokinetic studies were done to see what happens to these chemicals once they get into your body.
 - iv. **No** genotoxicity studies were done if these chemicals will damage your DNA.
 - v. **No** carcinogenicity studies were done to determine if these substances will cause cancer.
 - vi. **No** studies were done to see if this is safe for pregnant women.
 - vii. **No** studies were done on how the experimental injection affects prenatal and postnatal development in moms or newborns.
 - viii. **No** studies were done to see what happens when couples get the injection and—any subsequent children they may have—also received the shot.
 - b. For the **Moderna vaccine**, according to the FDA (Source: tinyurl.com/wzb64n3c)
 - i. **They do not know** if the Moderna injection will protect people for more than 2 months.
 - ii. **They do not know** if it will provide any benefit for people who have already tested positive.
 - iii. **They do not know** if the injection will stop people from dying of Covid.
 - iv. **They do not know** if the injection prevents the virus from being transmitted from person-to-person.
 - v. **They do not know** if the injection will be safe for a large percentage of the population.
 - vi. **They do not know** if the injection will make getting the disease even worse.
6. **Long list of immediate side effects:** According to CDC/FDA Reporting system VAERS side effects include: Guillain-Barre Syndrome, stroke, respiratory failure, meningitis, myocarditis, heart attack, convulsions/seizures, autoimmune disease, narcolepsy & cataplexy, anaphylaxis, acute disseminated Encephalomyelitis, Transverse Myelitis, Encephalitis, and many more (Source: vaers.hhs.gov) What about long term side effects? Long term effects passed down to children? **NO ONE KNOWS**
7. **People are DYING from the vaccine:** Data released July 30 show that between Dec. 14, 2020 and July 23, 2021, a total of 518,770 total adverse events were reported to VAERS, including **11,940 deaths** (Source: tinyurl.com/t5sbt6b2)
8. **Vaccine manufacturers have NO LIABILITY if you DIE:**
 - a. The PREP Act (2005) authorizes the Secretary of HHS to limit legal liability for losses relating to the administration of medical countermeasures such as diagnostics, treatments, and vaccines. Under the HHS Declaration and its amendments, covered persons are generally immune from legal liability (i.e., they cannot be sued for money damages in court) for losses relating to the administration or use of covered countermeasures against Covid-19. (Source: tinyurl.com/wern2adc)
 - b. In 1986, the DTP vaccine was causing brain injury in 1 out of every 300 people. Vax manufacturers said to Congress they cannot make vaccines safely and **ADMITTED** they are "**unavoidably unsafe**" so Congress passed H.R.5546 - National Childhood Vaccine Injury Act of 1986 to give vax manufacturers blanket immunity from liability.
9. **Not effectively preventing or containing Covid**
 - a. CDC study shows vaccinated still spread the virus: Barnstable County, MA: of the 469 **positive** Covid cases, 346 (74%) occurred among the fully vaccinated (Source: tinyurl.com/5ayctx8d)
 - b. The clinical trials for the Pfizer experimental injection demonstrated the shots:
 - i. **DO NOT** stop you from getting Covid
 - ii. **DO NOT** stop you from getting very sick with Covid
 - iii. **DO NOT** stop you from being hospitalized because of Covid
 - iv. **DO NOT** prevent you from transmitting Covid to others (Source: tinyurl.com/ysewk4tj) **SO WHY THE MASKS IF THE VACCINES (DON'T) WORK?**
10. **Contains experimental, industrial and proprietary chemicals:**
 - a. **Pfizer BioNtech:** ALC-0315, is a positively charged molecule that helps nanoparticles form; DSPC & Potassium Chloride; Monobasic Potassium Phosphate; Sodium Chloride; Dibasic Sodium Phosphate Dihydrate, which some of these ingredients can be found in fertilizer. (Source: tinyurl.com/d756tbfa)
 - b. **Moderna:** SM-102 is a proprietary substance, which details about it do not have to be disclosed to the general public, but **YOU HAVE THE RIGHT TO KNOW AND IF IT'S SAFE** (Source: tinyurl.com/2mp7r8ta)
11. **The Emergency Use presumes there's no other treatments for Covid-19:** **Ivermectin** is a medication that has been used safely for more than 30 years and works well in treating patients with Covid-19. **Hydroxychloroquine (HCQ), Vitamins D and C and Zinc** physicians have found to be safe and effective in preventing and treating Covid but the government does not promote these treatments and instead recommend masks and vaccines. The media and the WHO have been covering up the effectiveness of these alternative treatments to justify the Emergency Use of the Covid vaccines so Big Pharma can make billions in profits. (Source: tinyurl.com/pmtksts2)
12. **Doctors presenting science against the Covid agenda are being censored:** proponents of the Covid vaccine say the opposition doesn't follow the science but thousands of doctors agree there are alternative treatments to successfully fight Covid-19. That info is censored on the social media & Internet. (Source: tinyurl.com/4zmd7tn8)
13. **You're just as likely to die from lightning as you are from Covid:** You're chances of surviving Covid from age ranges are listed here but when you factor out the faulty PCR tests and comorbidity rates, you're just as likely to die from covid as you are from a lightning strike (see 14 and 15) :
 - a. 0-19 years 99.997%
 - b. 20-49 years 99.98%
 - c. 50-69 years 99.5%
 - d. 70+ years 94.6% (Source: CDC.gov)
14. **The PCR test doesn't tell you if you're sick:** Kary Mullis, inventor of the PCR test—the test being used by medical staff to detect Covid-19—admitted that the PCR test was never designed to tell you if you're sick (Source: <http://tinyurl.com/4e7dm7zu>)
 - a. Even Anthony Fauci has indicated that most PCR tests are being done wrong and finds dead nucleotides, not infectious viruses. In other words, the tests are supposed to detect Covid when there really is no Covid. (Source: <http://tinyurl.com/3axcdzr4>)
 - b. And the FDA has approved up to 40 CYCLES (Source: tinyurl.com/zrmdwuek) for the PCR test, so the higher the cycles, the higher the chance of a false positive and most of the tests are not finding Covid, but DEAD NUCLEOTIDES, as Anthony Fauci has admitted.
15. **People aren't dying from Covid; they're dying from comorbidity:** CDC admits that 94% of Covid deaths had an average of 2.9 comorbidities, which means 94% of people that died from Covid, on average, had 3 other diseases that could have contributed to their death (Source: tinyurl.com/pj5z6mxz)
